Company Overview

Texas AI Consulting helps Texas agencies, healthcare systems and businesses put AI to work safely. Led by a 22-year U.S. Air Force veteran and Registered Nurse with 20+ years of health IT experience, we pair clinical practice with IBM-certified AI engineering to modernize legacy workflows and keep patient and public data secure.

Core Competencies

- **AI strategy and implementation:** roadmaps, workflow automation, custom models and NLP
- **ChatGPT and generative AI deployment:** use-case discovery, rollout, prompt engineering and staff training
- **AI governance:** Texas TRAIGA (HB 149) readiness, transparency and bias review
- **Software, cloud and data:** full-stack web apps, APIs, Google Cloud, Docker, ETL pipelines and Power BI
- **Healthcare IT:** Epic, Cerner and Meditech workflows; HIPAA-compliant system design

Differentiators

- **Clinical + technical leadership:** a Registered Nurse who is also an IBM-certified AI engineer
- **Veteran leadership:** U.S. Air Force Flight Nurse and Mission Crew Director, Air Medal recipient
- **VetHUB utilization:** helps prime contractors meet Texas VetHUB subcontracting goals
- **Credentials:** OpenAI Partner Network member; IBM AI Engineering and Full Stack certificates; MBA
